

The assignment guidelines have been discussed progressively during our classes.

Submission deadline: 11pm, 28/08/2026 (Fri) Week 11

- Video: Just include the assignment title; no need to put team members' names.
- Include the links of your related dataset (if any) as the first item in the list of references.
- Include any relevant links (e.g., the Interactive Streamlit Dashboard, video, etc.) in the PowerPoint slides (on the second slide) and in the report's table of contents (as the last item).
- Do not zip your files.

Presentation: Formal attire. All members must present according to the group contract tasks.

Submit the following items:

1. Finalized Main Coding File:

- Submit all related coding files.
- Include all necessary sub-topics/sub-sections in the code to ensure clarity and proper presentation of the outputs.

This should encompass:

- Results and observations made.
- Any parameter settings or configurations used.
- Describe the purpose of the sub-topic/sub-section and the techniques being tested.
- Outline the setup, including any libraries/packages or tools used.
- Provide commented code segments, clearly separating different sub-topic/sub-section.
- Discuss the patterns or insights observed.
- Summarize the key findings from the project and their implications.

Deployment: Emphasis for interactive visualization and user interaction.

- Incorporate a user interface/dashboard using Streamlit or other suitable platforms.
- Run all codes and submit the files in both PDF and .ipynb formats.

2. Report:

- The report should include all essential elements and be around 50 pages. Arrange all diagrams and figures appropriately to save spaces. Formatted in Times New Roman, font size 11. You may include any additional details in the finalised main coding file.

- Include relevant mathematical equations, diagrams, tables, and figures, with discussions and justifications.

- Use in-text citations and a list of references and their DOIs in APA format.

- Submit the report in both MS Word/Google Doc and PDF formats.

3. Originality Report:

- Put the report in Google Docs format in order to generate the originality report.

4. PowerPoint Slides:

- Highlight the essential aspects of the report. Include partial or essential diagrams, tables, and figures.

5. Videos:

- Submit project related output videos. Please include only the assignment title; there is no need to include team members' names.

6. Group contract:

- Include some details of the tasks carried out by team members.

7. AI usage disclosure form:

- Fill up the details in the form and submit it according.

8. Assessment Rubric:

- Fill in the group members' names and IDs. Submit the assessment rubric in MS Word/Google Doc format. Submit this file separately; please do not attached it to the report.

9. Experimental coding files

- Include codes and the necessary comments related to experiments performed with the techniques.

9. Sample File Names:

- 1) G1 final coding (proper file names for coding related files)
- 2) G1 report
- 3) G1 OR report
- 4) G1 slides
- 5) G1 video
- 6) G1 group contract
- 7) G1 AI disclosure form
- 8) G1 assessment rubric
- 9) G1 experimental coding1, G1 experimental coding2 etc
